E-GOVERNANCE POLICY

Objective:

1. Implementation of E-governance in various functioning of the institution
2. Achieving efficiency in our functioning
3. Promoting transparency and accountability
4. Achieving paperless administration of the institution
5. Facilitating online internal and external communication between various entities of the institution
6. Providing easy access to information
7. Making the institution visible globally

Policy:

1. In order to provide simpler and efficient system of governance within the institution, it is decided to adopt and implement e-governance in maximum activities of our functioning.
2. The institution has already started with e-governance in some aspects of functioning like library, accounts, etc. But, now we have resolved to implement e-governance in many more areas and with this aim in view we have drafted this policy framework.

At NRI Institute of Information Science & Technology, Bhopal Following activities perform on account of E-governance:-

TALLY ERP-9:	Salary, Student fee account, other account related work
University Exam Portal:	Database, Examination, Admission and other administrative aspects
Lib-Guru:	Library database
Website:	Developed & maintained by in-house team (GoDaddy.com)
Admission:	Through DTE Portal on MP ONLINE

The Committee indentified the potential for e-governance in areas like Planning and Development, Administration, Examination Management System (EMS), Finance and Accounts, Student admission and support.

A brief report is presented below:

1. The most indispensable element in the implementation of E-governance in any scenario rests on unlimited and unrestrained internet connectivity. In NIIST, Bhopal the major form of connectivity is achieved via a LAN connection, with a maximum capacity to support 768 systems. Nonetheless the college has been over-reliant on this

connectivity with all systems at present. Yet another form of connectivity in the campus derives from Wi-Fi and the college is yet to provide unlimited connectivity.

2. Regarding Student admission and support, the college has made a great leap in the implementation of E-Governance with a full automation of student admission procedures and maintenance of an exhaustive student profile, with DTE Admission portal as well in house admission record facility.

3. In case of Personal, Pedagogical and Administrative Support for teachers, attempts have been limited to the creation of an advanced profile for faculties. There is still scope for further improvement by the inclusion of an activity log, notification broadcasting system, etc.
