4. Ban on use of Plastic

- Sustaining cleanliness is the essential part of healthy living because it is hygiene and helps us to develop our personality by keeping us clean externally and internally. So Niist decided to go plastic free in the campus. There are no plastic plates and spoons instead of that we are using steel and glasses plates and spoons inside the campus. We are using only steel.

5. landscaping with trees and plants

- Within the campus, the institution maintains a clean and green environment. By establishing a distinct estate maintenance wing, the Institution ensures the preservation of the environment.

- It maintains the lawn and plantations by employing gardeners and sweepers.

- Our institution is more concerned with keeping a green campus and being environmentally friendly, which ensures that pure oxygen is available throughout the building.

- The campus has been made greener by the addition of more trees, providing a pleasant environment for students to learn in and faculty members to work in.
