Alumni Talk

About us:
The term 'Alumni Talks' refers to an interactive session between college students and alumni. Alumni guide and share our work experiences with students.

Up Skilling for Future:

28/01/2023

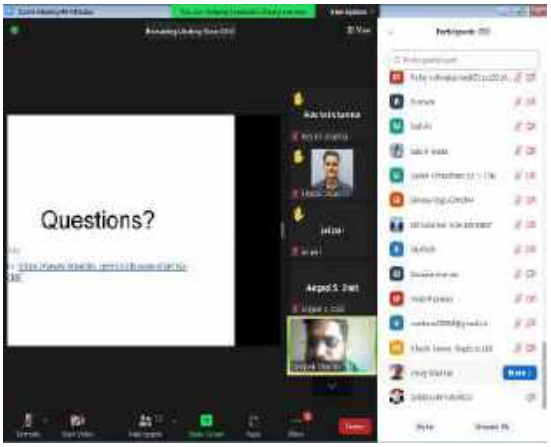

Master of Computer Application Department in NIIST Organized an “Alumni Talk on Up skilling for Future”. Our alumni Mr. Deepak Sharma (AVP Credit Suisse), He was the 2010 batch student. It gives the information regarding how to up your skills according to Industry requirement. It was a very interactive session Students also asked their questions about industries’ work culture and company’s demand. Near about 75 students attend this session and take advantage of their experiences.

Impact on Students: After this session students known the knowledge of Current industry demand. He / She build our confidence after this session and known the right way to go and build our career. Near about 75 Students Join session of MCA/IT/CSE branch.

CNC TRAINING REPORT

CNC programming and Operations

Manufacturing trend has made a quantum leap towards CNC (Computer Numerical Control) from conventional methods. Industry is in great need of professionals with thorough CNC Programming knowledge in India and Abroad. CTC a newly started state –of– the – art training centre, offers High End Training in CNC PROGRAMMING AND CNC MACHINING

Course Overview

This course will make one familiar with the operating process, manual programming, computer assisted programming, tool & work setting and Product machining.

Training Modules

LEVEL 1

- CNC Machine Operator
- Understanding of all CNC machining operations
- Introduction to the working of CNC control panel

LEVEL 2

- CNC Machine Setter
- Machine settings / work-piece holding / tool holding
- Tool offset / work offset
- Changing offset parameters on CNC control pane

LEVEL 3

- CNC Programmer
- Basics of CNC programming: G codes and M codes.
- Advanced programming techniques using.
- Basic machining cycles
- Advanced machining cycles
- Canned cycles ¤ Mirroring commands
- Subroutines (Subprogram) and
- How to reduce the machining cycle time

LEVEL 4

- APT programming
- Basics of APT

Duration

Duration of the course is for 4 days

Course Fee

Rupees five hundred (500/-).

Unique Features

- Training on CNC Machinery
- CNC programming & Simulation Using CNC Software's
- Coverage of latest Trends in CNC
- Industry standard live Project training
- High speed machining concept
- Cutting Tool Technology
- Preventive maintenance of CNC Machines
- Tips & Tricks to improve one's CNC skills
- Theory classes will be supported with the help of videos and power point presentations

In –House Technical Training on Advance Excel and Fundamentals of SQL on 02/09/2022

Department of Computer Science and Engineering conducted ten days of house technical training on Advance Excel and Fundamental SQL for third-year B.Tech. students, in these ten days, daily three hours practical and theory sessions were taken by the faculties of the computer science and engineering department, NIIST. The purpose of this training is to equip participants with the skills and knowledge necessary to use advanced data operations such as summarising, PivotTables, data consolidations, goal seeking, Solver, creating lookup functions, setting Excel working options, enhancing charts, protecting worksheet data, and creating and using macros. One of MS Excel's key benefits is that it makes data entry quick and simple. When compared to other data entry and analysis applications, MS Excel has features like a Ribbon interface, which is a menu of commands used to carry out certain tasks. The ribbon is made up of many tabs, which themselves are made up of many command groups and their buttons. By pressing the appropriate button, you can choose the commands and carry out activities quickly. Alternatives for accurate comparisons and analysis: For the proper comparison and analysis of substantial amounts of data, MS Excel offers a wide variety of analytical tools. You may filter and sort through a lot of data using sophisticated methods, making it simpler for you to get the information you need. Students in this training get knowledge of certain fundamental MySQL query statements. Students learn how to use the SELECT statement and select statement clauses like FROM, DISTINCT, WHERE, ORDER BY, and LIMIT to retrieve database data. Then students go through how to query several tables with a join keyword and how to utilize a JOIN term to mix data from other tables. Discuss cross joins inner joins, and outer joins, three different forms of joins. The trainer covered how to utilize an outer join and an inner join to find rows that match and those that don't. Total of forty students of third-year B.Tech. Registered and attend the training sessions.

In –House Technical Training on MS – Office on 05/07/2022

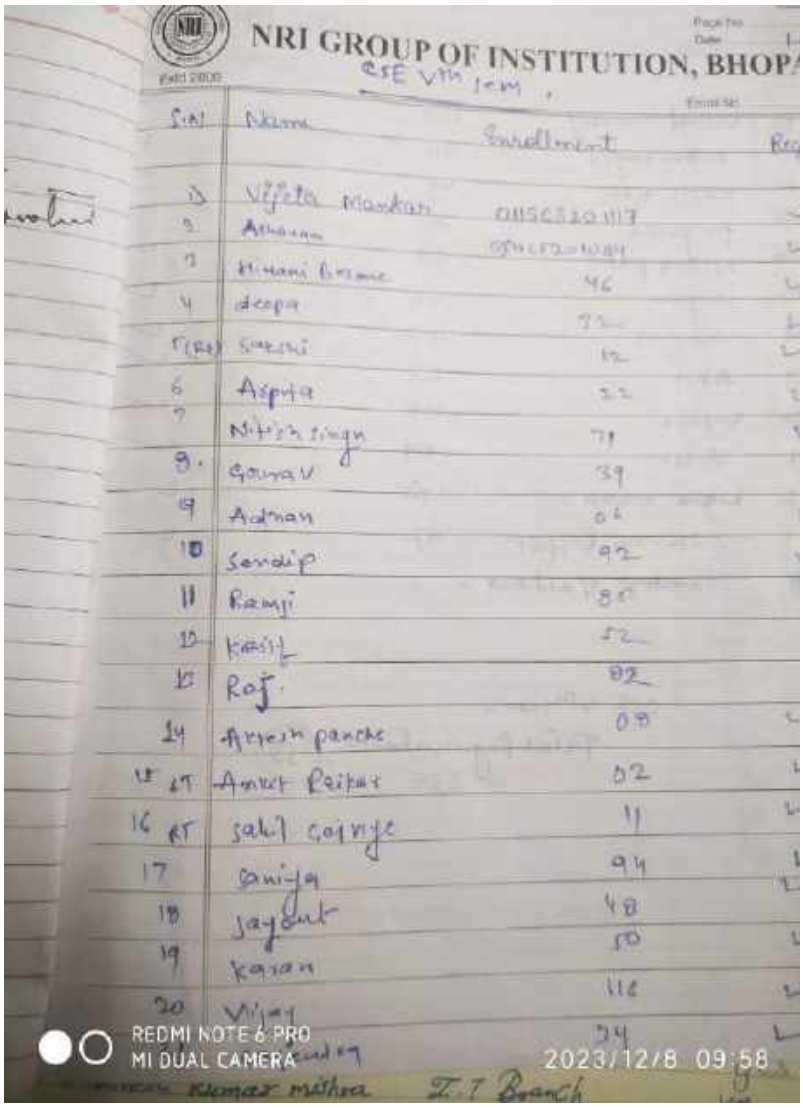

Department of Computer Science and Engineering conducted six days of house technical training on MS –Office for first-year B.Tech. students, in these six days, daily three hours practical and theory sessions were taken by the faculties of the computer science and engineering department, NIIST. MS Office is a collection of programs made to increase productivity and carry out typical operations on a computer. You can make presentations and posters, deal with data in databases and spreadsheets, and create and edit documents with text and images. Seventy students are registered for this training and students clear their doubts regarding topics and they are attending the training enthusiastically manner. MS Office is a very popular program that is used by every person in any field in their day-to-day life. The objective of conducting this training is to be familiar with how to use Microsoft office and to be able to develop papers that can be printed and shared. The capacity to produce and distribute presentations. Being able to control and keep data in a spreadsheet.
