**Report: Tree plantation campaign at NIIST Campus on 03/09/2022.**

Tree plantation is the process of transferring of seedlings from one place to another for different purposes. Furthermore, there are various reasons behind tree plantation but the most important are forestry, land reclamation, and landscaping. Each process of tree plantation is important and unique in its own way.

Trees promote a strong economy and can provide numerous resources to the people that live around them. While cities are getting hotter, trees can reduce urban temperatures. They provide habitat and food for animals. Finally, trees are valuable green infrastructure to manage storm water.

We have started this activity on NRI campus on 03/09/2022 by NSS unit in NIPS ground at 10 am onward. Many trees are planted in the campus by all principal and students.
