Subject:-Request for Permission to Conduct Renewable Energy Day Celebration

Respected Sir,

I respectfully request your permission to conduct Renewable Energy Day Celebration in our department on **14th December**. The event will include demonstrations on energy conservation and renewable energy technologies.

This celebration will help our students understand the importance of sustainable energy practices and promote environmental responsibility.

Kindly grant us permission to organize this program and utilize the required facilities for the successful conduct of the event.

Thanking you,

R

INTRODUCTION:

World Energy Conservation Day 2024 is observed on December 14 every year. It focuses on making people aware of global warming and climate change and promoting efforts towards saving energy resources. With a growing population, the requirement for energy resources is also increasing. Energy conservation is an effort made to reduce the consumption of fuel and use the least energy resources to save for the future.

HISTORY AND SIGNIFICANCE OF WORLD ENERGY CONSERVATION DAY

The Energy Efficiency Bureau implemented the Indian Energy Conservation Act in 2001. The BEE is a constitutional body that works under the Indian Government and helps in the development of policies and strategies to reduce the use of energy.

National Energy Conservation Day is observed on December 14, every year. The day focuses on making people aware of global warming and climate change and promotes efforts towards saving energy resources.

AIMS:

-Encourage students and all faculties to use less energy rather than excessive and extravagant energy.

- Encourage students and all faculties to reduce energy consumption and use it's efficiently.

Ultimately, it can be said that our scientists are engaged in discovering and developing new and alternative resources of energy. But it is our duty to understand the importance of energy

and become aware of energy conservation. We should always try that we don't waste energy.

REPORT ON NATIONAL ENERGY CONSERVATION DAY

On 14th December 2024, National energy conservation day was organized by NRI institute of information science and technology to raise understanding and awareness of National energy conservation among students, teaching staff and non-teaching staff.

The National energy conservation organized on 14th Dec 2024 from 12.00 pm to 3.00 pm, approximately all students teaching and non – teaching staff were physically present in the mess for dinner and they had dinner by lightening the candle for 1 hour instead of use of electricity.

The programme was organized by Electrical and Electronics Department.

The programme ended with explaining the importance of saving the energy and the ways of energy conservation, turning off the light when you leave the room, unplugging appliances when they're not in use and walking instead of driving are all examples of energy conservation. In this way we create awareness and encourage students as well as teaching and non-teaching staff to save energy.

The programme is well organized for students were very informative and well appreciated by the participants.
